

**U.S. Government Standard General Ledger
USSGL Attributes**

To meet external reporting requirements, agencies need data at a level below the four-digit USSGL account. Agencies’ systems must capture this information at the transaction level by recording transactions using USSGL four-digit accounts plus attributes. This section provides USSGL attribute tables for the FACTS I and FACTS II “trial-balance” reporting systems administered by FMS.

Attributes are like adjectives that further describe a USSGL account in order to meet a specific reporting requirement. Domain values are all of the possible valid choices within an attribute. For example, if in a room there is a red chair and a blue chair, then you only need one attribute to describe them: color. The valid domain values within the attribute “color” would be “red” or “blue”. If you wanted the red chair, there would be no need to use additional adjectives such as weight, height, or size to describe it. This is because, in this example, color is enough to uniquely identify the chair. Additional description would be a waste of time and resources and add no value. Therefore, only those attributes and those domain values that are necessary to uniquely identify the reporting requirement should appear on the crosswalks.

The attributes in the FACTS I data table were effective in agencies’ systems October 1, 2000, for fiscal 2001 yearend reporting. Additionally, these attributes have been effective for agencies’ financial statements since the release of the Office of Management and Budget (OMB) Bulletin 97-01, Form and Content of Agency Financial Statements, dated October 16, 1996. However, attributes collected in FACTS I are used in preparation of the Financial Report of the United States Government and do not include all of the attributes used to prepare agency financial statements required by OMB Bulletin 97-01.

Attributes Used on the Financial Report of the United States Government (Financial Report)

USSGL attributes are one component of detailed data in agency financial systems related to the external reporting financial statements. The FACTS I data table shows the USSGL account balances and the related attribute information captured at the transaction level that support production of the Financial Report. The USSGL crosswalks for the financial statements in OMB Bulletin 97-01, as amended, reference these attributes as a requirement for proper reporting on the particular financial statement line items.

Form and Content Agency Financial Reports

The FACTS I data table does not show all the USSGL account attributes necessary to produce agency financial statements required by OMB Bulletin 97-01, as amended. Refer to Section V: Crosswalks to Standard External Reports.

Attribute Definition Report

This report provides definitions for the attributes associated with each proprietary USSGL account for FACTS I reporting. Starting with the fiscal 2001 reporting cycle, agencies will report adjusted trial balances and selected NOTES amounts in FACTS I with those attributes described in the detailed financial information.

FACTS I USSGL Accounts and Attributes

The USSGL account and related attribute table for fiscal 2002 shows USSGL accounts, account titles and normal balance indicators for USSGL accounts that agencies will use for FACTS I reporting. The table also shows the related attributes agencies must provide for each USSGL account reported in FACTS I; these columns contain one of three values.

Space	This attribute is not reported in FACTS I for the USSGL account.
Y	Yes, report this attribute in FACTS I when this account is submitted. A list of the valid values for each attribute is on the last page of the attribute crosswalk.
Other	In some cases, attributes are filled in with a value other than “Y” or space. For example, Federal NonFederal often appears with an “F” (Federal) in a shaded cell. Shaded attributes show the domain value that FACTS I predefines as appropriate for a specific USSGL account. The FACTS I system will supply shaded attribute values for the designated USSGL accounts.

The FACTS I team will update crosswalks periodically between TFM releases. For the latest information, log onto website www.fms.treas.gov/cfs/dev.

Attributes Used on the Budgetary Reports

USSGL attributes are one component of a data model that describes how detailed data in agency financial systems (e.g., USSGL account balances with related attributes captured at the transaction level) relate to external requirements. The data model also shows the relationships between the budget accounts published in the President's Budget and the Treasury Appropriation/Fund Symbols collected in FACTS II, which are published in the Treasury Annual Report – Appendix. The data model includes:

- ◆ Entity Relationship Diagram
- ◆ Entity Definition Report
- ◆ Attribute Definition Report
- ◆ FACTS II USSGL Accounts and Attributes Crosswalk

Entity Relationship Diagram

This diagram shows the relationship between entities or groups of data. It includes Budget Formulation Accounts, Treasury Appropriation/Fund Symbols, USSGL accounts and related attributes as well as financial data reported by Federal agencies to OMB and Treasury. The diagram shows the relationships between (1) information published in the President's Budget and the Treasury Annual Report Appendix, and (2) detailed data captured in agency financial systems and summaries of these data presented in OMB and Treasury publications.

Entity Definition Report

This report provides definitions and business rules for relationships between all entities.

Attribute Definition Report

This report provides definitions and related information for all attributes associated with each entry. Agencies will report on those attributes described in the detailed financial information entity.

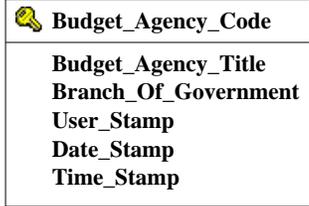

FACTS II USSGL Accounts and Attributes Crosswalk

The USSGL account and related attribute tables for fiscal 2002 shows USSGL accounts, account titles and normal balance indicators for USSGL accounts that agencies will use for FACTS II reporting. The table also shows related attributes agencies must provide for each USSGL account reported in FACTS II; these columns contain one of three values.

Space	This attribute is not reported in FACTS II for the USSGL account.
Y	Yes, report this attribute in FACTS II when this USSGL account is submitted. To determine valid domain values, refer to the Detailed Financial Information portion of the “USSGL Attribute Definitions” in this section.
Other	In some cases, attributes are filled in with a value other than Y or space. For example, Begin_End often appears with an E (end balance) in a shaded cell. Shaded attributes show the only valid value that FACTS II will accept for a specific USSGL account.
